

Solutions for Healthcare

Here's how net2phone prescribes communication solutions for healthcare facilities.

- **Reduce Costs:** A cloud based phone system offers simple all inclusive pricing and savings of up to 70% over traditional landlines
- **SMS/MMS Texting:** Confirm appointments, update appointment status, and follow up with patients
- **Equipment:** State of the art desk phones and cordless phones for office staff and a variety of paging and intercom devices for the facility
- **Unlimited Auto Attendant:** Automatically greet callers, deliver information like open hours, and route calls freeing your front desk to focus on in-person patients
- **Safe & Secure:** Our HIPAA compliance program ensures your communications and patient interactions are protected and secure with net2phone's compliance program
- **Cross-Location Collaboration:** Consolidate multiple locations under one phone system, easily transfer calls, and dial by extension
- **Video Conferencing:** Keep patient interactions personalized even for remote appointments, patient screenings and reviewing results
- **Find Me / Follow Me:** Conduct pre-shift or training meetings and communicate easily with remote vendors and management staff
- **Analytics:** Understand your staffing needs and evaluate performance of marketing campaigns

"Our net2phone Onboarding specialist was on the phone with each employee, walking them through the solution, answering questions, and ensuring every user felt confident in using the platform. I have no words. It was the best experience possible and our team was ecstatic with the level of support."

Naomi Wray,
Cosmetic Surgery Consultant &
Administrative Operations Manager
